

United Airlines Accident Records: Outcomes

Accident 1: United Airlines Flight 232 (Accident ID: 1)

Outcome: The aircraft broke apart upon landing. Out of 296 passengers and crew, 111 were killed, and 185 survived, many with injuries. The incident highlighted the need for improvements in engine design and emergency response procedures.

Accident 2: United Airlines Flight 93 (Accident ID: 2)

Outcome: The plane crashed into a field, killing all 44 people on board. The passengers' actions prevented the aircraft from reaching its intended target. The heroism of the passengers was widely recognized and honored.

Accident 3: United Airlines Flight 328 (Accident ID: 3)

Outcome: The aircraft returned to Denver International Airport for an emergency landing. There were no injuries among the passengers or crew. The incident led to inspections and modifications to similar engines to prevent future failures.
