

Air Canada Accident Records: Outcomes

Accident 1: Air Canada Flight 797 (Accident ID: 1)

Outcome: After the aircraft landed, the fire rapidly spread, resulting in the deaths of 23 passengers. 21 passengers and all crew members survived. This incident led to significant changes in aircraft fire safety regulations, including the installation of smoke detectors in lavatories and improved fire-fighting equipment on board.

Accident 2: Air Canada Flight 624 (Accident ID: 2)

Outcome: The aircraft was severely damaged, and all passengers and crew evacuated safely. 25 people sustained minor injuries. The incident prompted a review of landing procedures in adverse weather conditions and improvements in approach and landing aids at the airport.

Accident 3: Air Canada Flight 759 (Accident ID: 3)

Outcome: The near-miss incident was averted, and no injuries occurred. The aircraft went around and landed safely on a different runway. The incident highlighted the need for clearer communication and procedures regarding runway closures and air traffic control instructions.
